

Exhibitor feedback from WindEnergy Hamburg 2024 (in alphabetical order)

Udo Bauer, CEO Enercon:

"The WindEnergy Hamburg is one of the most important sector events for the wind industry – and for ENERCON. We always enjoy being here and showcasing our latest products and tailored service offerings. The trade fair is an excellent opportunity to meet customers and interested parties, discuss new projects and cooperations, and network with other stakeholders. Two years ago at the last WindEnergy, there was a remarkable spirit of optimism in Hamburg. We were really looking forward to building on this positive exchange this year!"

Girish Tanti, Vice-Chairman Suzlon Group / Vice-Chair GWEC:

"WindEnergy Hamburg is the most important trade fair for the industry. I've witnessed its growth from a modest event in Husum to the global platform it is today. The topics discussed here set the stage for how we can make the 3xRenewables vision a reality across the world."

Dr. Robert Habeck, Vice Chancellor Minister of Economics:

"I have a deep connection to WindEnergy Hamburg. As someone from northern Germany, the true heart of wind energy, it's a key part of my political identity. I'm sorry I can't attend in person this time."

Senator Dr. Melanie Leonhard:

"WindEnergy Hamburg is a forum of exchange and a driving force for energy transition."

Dr. Philipp Nimmermann, State Secretary at the Federal Ministry of Economics and Climate Protection:

"The energy (in this room and) all across the trade fair is enormous."

Heiko Lammers, Head of Communications Alterric:

"We are extremely satisfied with WindEnergy Hamburg. The event has given us a fantastic audience and an ideal platform for entering into a dialogue with business partners, property owners, banks, and financiers. Here, we can initiate new project concepts and drive the energy transition together."

Vivi he, Marketing Management Director of SANY RE:

"This is the biggest trade fair in the wind energy industry. It's incredibly professional, and all of our key customers are here. For us, it's a great chance to connect and strengthen relationships. When we attended for the first time in 2022, the feedback we brought back to China was so positive that our leadership decided we'd definitely be coming back for future events."

Till Schorer, Director Customer Relations wpd windmanager:

"We have attended WindEnergy Hamburg for years. To us, it feels like a class reunion every time. We see many familiar faces, establish new business relationships, and share views and ideas on business management with operators and investors."

Anna Aksioutina, HR & Marketing Samawatt:

“It’s been a truly dynamic experience at the AI Center. We had a significant number of interested visitors at our booth, and we’re looking forward to following up with them after the fair.”

Andreas Bierlein, Head of Rotor Bearing Application Technology Schaeffler:

“We are very satisfied with WindEnergy Hamburg 2024. This industry fair is of great importance. It allows us to meet many customers, suppliers, and partners at a single central location within a short time span – it is simply ideal for that. As developers of key components for the wind industry, we are well-connected, as the lively attendance at your exhibition stand and the many positive conversations during the fair have shown.”

Jim Bell, Integration Director Venterra:

“The WindEnergy Hamburg is truly massive. Our booth has been bustling with activity, highlighting the importance of offshore wind energy. For us, as a young company founded just three years ago, it’s a special opportunity to connect with our supply chain partners.”

Nils de Baar, President of Vestas Northern and Central Europe:

“WindEnergy Hamburg provides us with the perfect setting to demonstrate to our partners, customers, and colleagues why we are the global leader for sustainable energy solutions. This year we presented our latest turbine technologies, the EnVentus onshore platform, as well as our offshore flagship turbine V236-15.0MW. And as the world’s most sustainable energy company, many of our conversations also centered on our sustainability initiatives, including our commercial low-emission steel offering.”

Maik Schlapmann, CEO XERVON Wind GmbH:

“WindEnergy Hamburg was a full success for us. This year we shared a stand with XERVON Oberflächentechnik, TSR Recycling, and Rhenus Offshore Logistics for the first time. The rush of visitors to our stand was a pleasant surprise to me. We had many interesting conversations and made some promising contacts. We are especially proud of the signing of a cooperation agreement we had been working on for a very long time.”

Dr. Henning von Stechow, Chairman of the Board Prokon Regenerative Energien eG:

“For us as Germany’s largest energy cooperative, the development and operation of wind farms are the most important business activities. Visiting WindEnergy Hamburg allows us to learn about current technology developments for wind energy, discuss trends in our core markets, and maintain business ties. What makes this trade fair unique is the fact that everyone involved in driving this industry and thereby the energy transition is present here.”

Bärbel Heidebroek, CEO Landwind Group / Chairwoman BWE:

“This year’s anniversary edition of WindEnergy Hamburg demonstrated in impressive ways how innovative and powerful this sector is. Insightful panel discussions of top-flight experts but also face-to-face conversations at the exhibition stands have shown once more why the wind energy industry gathers in Hamburg at regular intervals for this exhibition.”

CRRC spokesperson:

“It is a great honor for us to be here at WindEnergy Hamburg. This is the first time that CRRC is presenting the company as a whole, showcasing products from our entire supply chain. This trade fair allows us to connect with our customers, suppliers, potential clients, and partners—people we would never have the opportunity to meet in China. We chose this trade fair not only because of its high level of professionalism but also because it attracts a wide range of potential customers.”

Ibrahim Özarlan, CEO Division Europe Nordex Group:

“We have been exhibiting at WindEnergy Hamburg for years, but this year the fair exceeded our expectations from the first day. We received new orders worth 260 MW from Poland and Latvia, we were awarded the Provisional Type Certificate for our N175/6.X turbine, and we launched a new hybrid tower for this turbine with a 200-meter hub height. Visiting delegations from Turkey and politicians from Germany, Belgium, and Azerbaijan came by our stand. We had extensive conversations with existing and new customers. The focus was on our latest turbine, the N175/6.X, and our recent milestone achievements, including 70 GW of rated power sold, 10 GW to Germany alone.”

Katja Wünschel, CEO RWE Renewables Europe & Australia GmbH:

“The energy transition in Europe is advancing. But much remains to be done if we are to achieve the EU climate goals. Power grid bottlenecks must be addressed and permitting processes for onshore wind farms must be streamlined and accelerated. Making the common energy transition project a success will take international cooperation as well as local acceptance. WindEnergy Hamburg is exactly the right place to bring together people who are in a position to initiate the necessary developments with good ideas and ‘wind power’.”

Axel Mohr, Head of Sales – New Energies Siemens AG:

“This year’s fair was an outstanding platform for us to present our latest medium-voltage energy supply and IoT technologies and solutions. It not only provided us with the opportunity to establish valuable new contacts but also allowed us to gain deeper insights into current market trends. Our show truck was well-attended at all times, a fact that clearly demonstrates great interest in our innovations for the energy system of the future. We are looking forward with great anticipation to the next fair and the opportunities it will bring.”
